

SuperStretch™ VINYL GLOVES

**Pull On tight.
Fit Snug.
Priced Right.**

Volk Protective Products is proud to introduce SuperStretch™ Vinyl Single-Use Gloves, the first durable and truly comfortable alternative to latex.

Choose SuperStretch™ Vinyl for tear resistance, better fit and comfort.

SuperStretch™ vinyl is a new option that combines the comfort and tactile sensitivity of latex with higher tensile strength and tear-resistance when compared to traditional vinyl gloves. SuperStretch™ Vinyl's reduced breakage and waste allows you to affordably provide latex-like protection with no concern for latex-allergies.

SuperStretch™ Vinyl – The First True Latex Alternative

Nothing can beat SuperStretch™ Vinyl for latex-like fit and feel and vinyl-like pricing.

How do we do it? Simply said, polyvinyl chloride's hardness is easily adjusted. Originally hard, polyvinyl chloride can be softened by adding plasticizers. We carefully manage the combination of ingredients until we created SuperStretch Vinyl. These gloves pull on tight and fit snug, making this the choice in single-use glove protection for tasks requiring the highest levels of manual dexterity.

Choose SuperStretch™ Vinyl for tear resistance, better fit and comfort. Other features include:

- Tensile strength: 11mpa (min); elongation: 400% (min) results in gloves that can be pulled on tight with dramatically less chance of breakage. Snug fit improves sensitivity. Less breakage means less waste.
- Average powder mass – not more than 2mg per glove for powder-free gloves.
- No natural rubber latex – but latex-like fit and feel – makes SuperStretch™ Vinyl the best alternative for businesses wanting to avoid latex allergy issues.

SuperStretch™ Vinyl Gloves pull on tight and fit snug, making this the choice in single-use glove protection for tasks requiring the highest levels of manual dexterity.

No natural rubber latex – but latex-like fit and feel – makes SuperStretch™ Vinyl the best alternative to avoid latex allergies.
